

int a = 5;

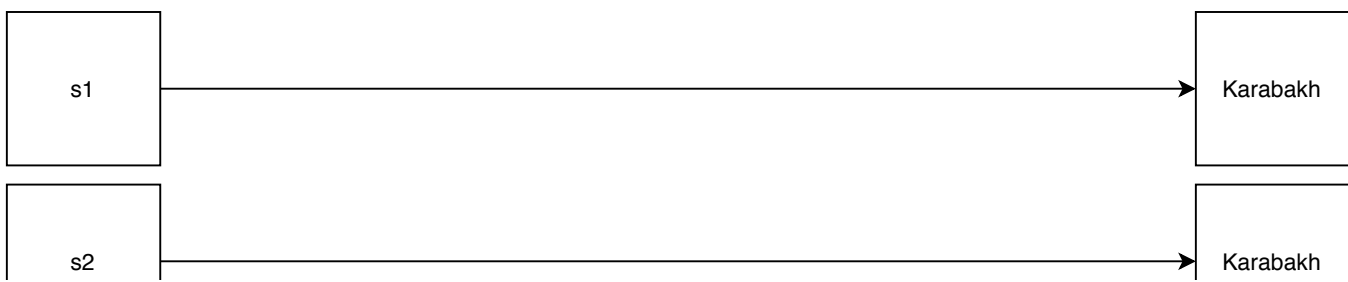

int[] b = {2};

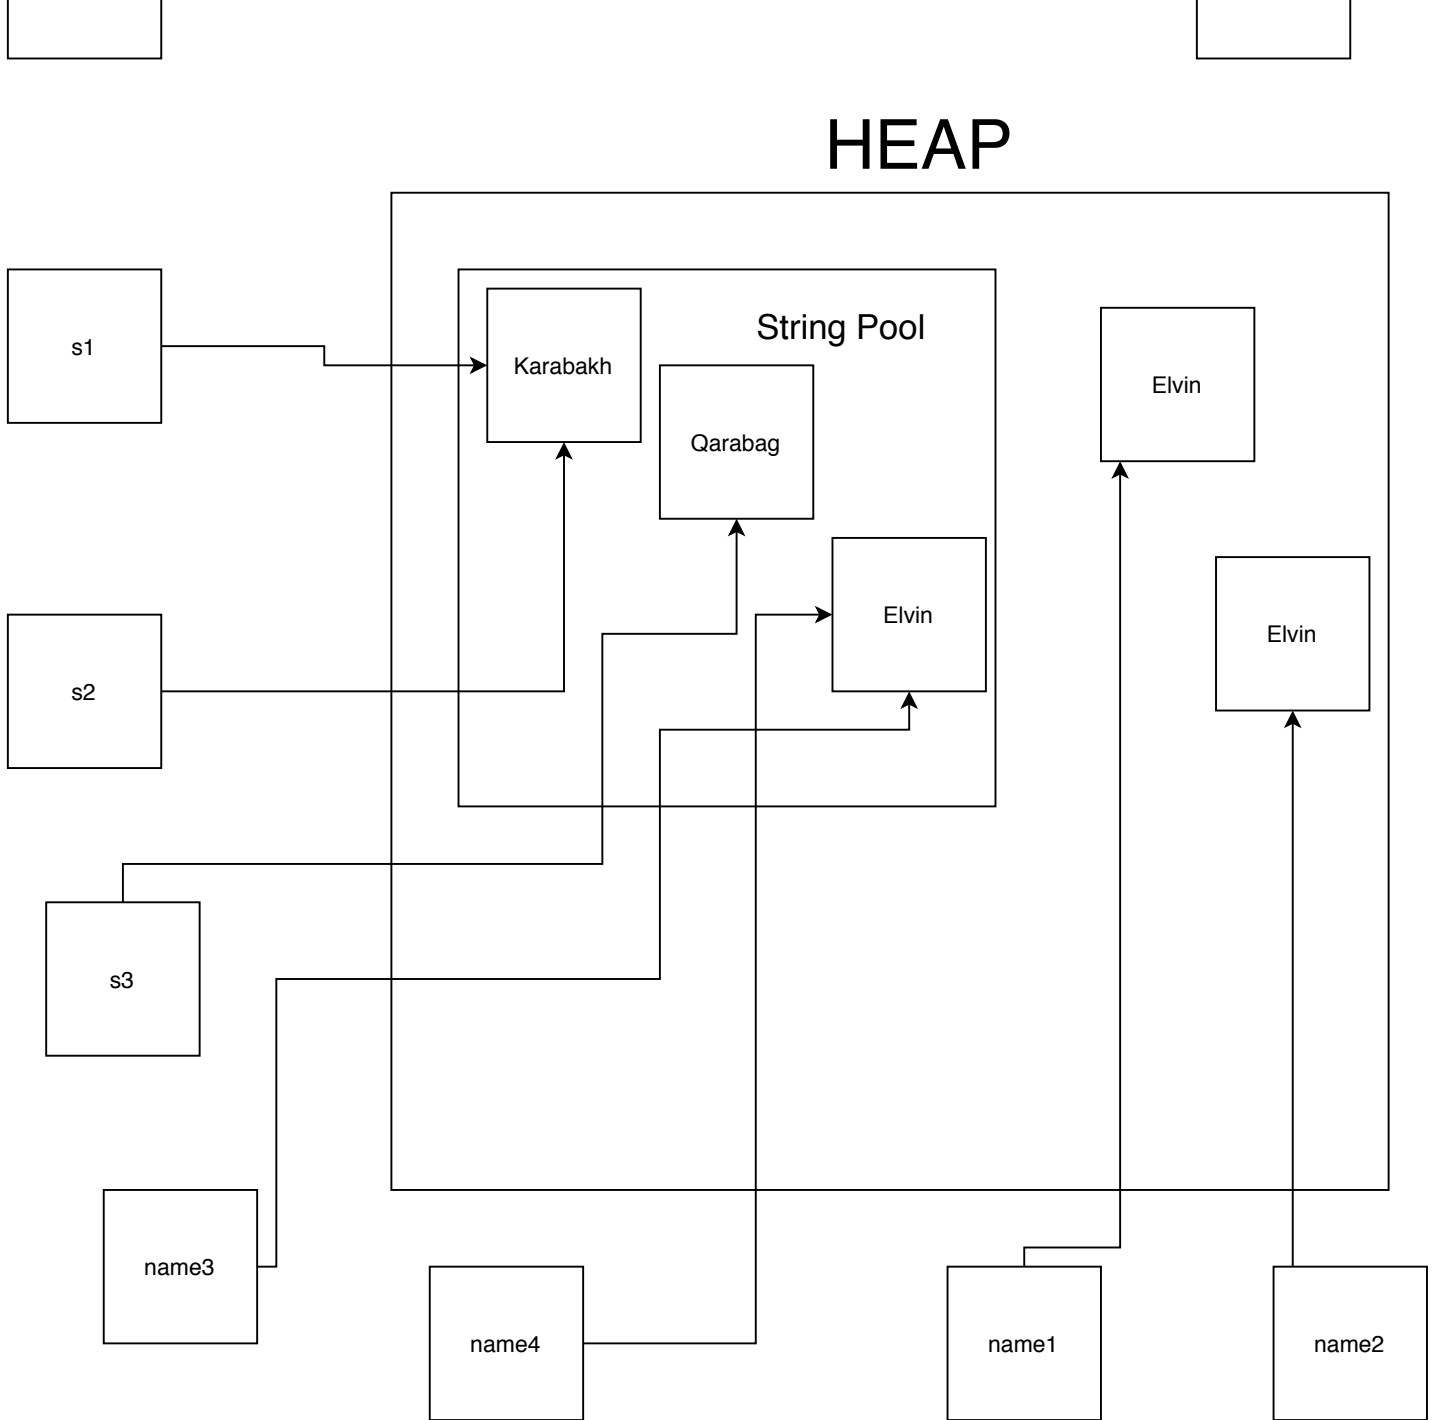

```
public static void main(String[] args) {  
    int[] a = {5};  
    int[] b = {6};  
    System.out.println(a[0]);    // 5  
    System.out.println(b[0]);    // 6  
    swap2(a, b);  
    System.out.println(a[0]);    // 6  
    System.out.println(b[0]);    // 5  
}
```

```
private static void swap2(int[] a, int[] b) {  
    int c = a[0];  
    a[0] = b[0];  
    b[0] = c;  
}
```

```
String s1 = "Karabakh";  
String s2 = "Karabakh";
```

mutable vs Immutable
